

QUALITY POLICY

Sidercad implements a Quality Management System since 1997 and aims to maintain and improve its effectiveness because Sidercad considers it an essential item in order to perform its activity in a correct, enduring and efficient way.

The company operational scope is characterized by strong competitiveness and Sidercad believes that it can maintain and enhance its market placement by offering quality products and services, capable of overtaking medium standards and getting a certain and long-lasting esteem by customers; in this context a Quality Management System is mandatory and so is its continuous evolution considering explicit and implicit needs of customers.

Furthermore, the company operational scope is governed by strict rules and by multiple regulations and evolving technical knowledges so that the company improving commitment means specific attention to training and technical and scientific know-how evolution.

For these reasons the company is committed to continuous improving of its Quality Management System and to meet the requirements of the regulation itself as described in the system documentation and according to objectives periodically reviewed and updated.
